

Sodexo weeklies

Something new, something forgotten, something to make a note of.

We will tell You on our weekly announcement on NIBnet

WASTELESS WEEK

ABOUT WASTELESS WEEK

What is it?

- WasteLESS Week is a five day campaign that runs during February at Sodexo sites around the world. It celebrates the fact that less waste means more quality of life.

Why is Sodexo doing it?

- We want to celebrate the hard work our sites and our clients have done to reduce waste. And we want to engage people in our achievements.

How will it work?

- During the week there'll be a series of simple and fun posters, communications and activities.

What happens for WasteLESS Week?

LET'S REDUCE WASTE TOGETHER

This week we will be weighing the plate waste from our Lunch Point

We will report the daily amount and see what we can together achieve

We will also report the wastage from our line. How much of the prepared lunch not sold is thrown away

YOU HAVE THE
POWER

TO TURN TRASH INTO TREASURE

Over 70% of what is thrown away could be recycled. Plastic bottles can become clothing, the aluminum from cans can be used to make smartphones. You can do your part by using the bins provided for recycling.

MORE THAN RESTORED, NEW OPTIONS EXPLORED.

FOOD

YOU HAVE THE
POWER

TO SATISFY TASTE WITHOUT WASTE

Although there is enough for everyone on the planet, more than 30% of food produced is thrown away. You can do your part to reduce food waste by only taking what you intend to eat.

TAKE WHAT YOU WANT BUT EAT WHAT YOU TAKE.

WATER

YOU HAVE THE
POWER

TO MAKE EVERY DROP COUNT

Water is essential to life but only 1% of the world's water is drinkable. 40% of people face water scarcity. You can help by turning off the tap, and by reporting any drips.

LESS DOWN THE SINK MEANS MORE TO DRINK.

ENERGY

PAPER

YOU HAVE THE
POWER

TO FLIP THE SWITCH ON ENERGY WASTE

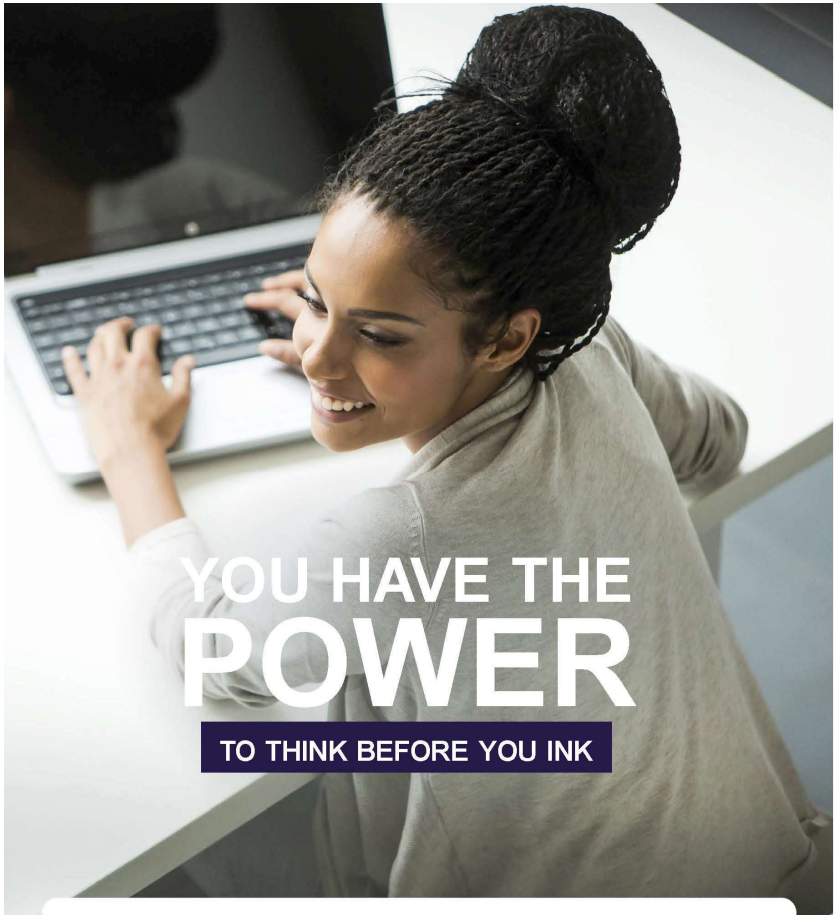

When we use less energy, we put less demand on power plants which means less air pollution. Energy efficient buildings and lighting make a big difference. You can help even more by turning off lights when you leave the room.

THE SKY'S THE LIMIT ON SAVING ENERGY.

YOU HAVE THE
POWER

TO THINK BEFORE YOU INK

It takes 24 trees to make one ton of office paper. You can help save our green spaces by double-sided printing on recycled paper, when you need to print.

LESS PAPER IN THE TRAY MEANS MORE TREES TODAY.
